

Creating JPG Images from PowerPoint

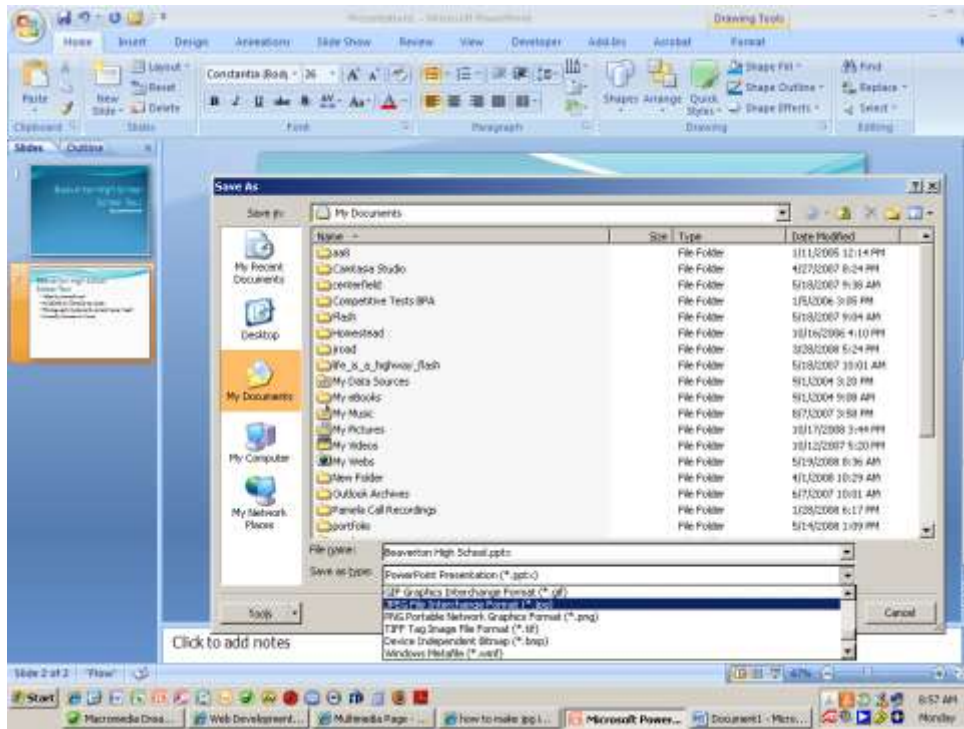

1. Open PowerPoint. Select the design you want to use from the Design tab. Enter text.

2. Insert New Slide from the Home tab. Select the layout style you would like to use.

3. Save images to JPG images. Click on the Office Circle, Save As, Other Formats, change SAVE AS TYPE to JPG. Make sure you are saving the images where you want and that you are using correct file naming technique (all lower case, no spaces).

When asked if you want to save current slide or every slide, select EVERY SLIDE.
